

DOCUMENTATION FOR EVERYTHING

## INHOUSE COMPETENCE

We naturally send documentation on quality assurance, operation and maintenance with our delivery. We comply with all current standards like CE Marking and the machine directives. In addition we make data sheets, drawings and fitting instructions for all our doors and gates. We simply possess the technical competence to ensure 100 % documentation on all our solutions.

QUALITY PRODUCTS MAKE A PROFIT IN THE LONG RUN

## QUALITY PAYS OFF

Door System develops and delivers top quality door solutions. Our solutions may not be the cheapest on the market off-hand. But high reliability and great savings on energy consumption and maintenance costs make it an extremely attractive investment in a lifetime perspective.

We develop and manufacture all doors at our own factory in Hasselager. Competent staff who over many years have accumulated great knowledge and insight, are one of the main reasons for the high quality that Door System delivers. We have our own service fitters throughout the country and we offer full scale service agreements.

### Advanced doors for the industry

Door System develops, produces and mounts doors for the industry in the Nordic countries. In addition to special solutions to the pharmaceutical industry, we deliver cold and freeze storage doors and quick doors for the food industry and others.

Our products live up to the strictest standards for installations in productions with high hygiene standards. High quality and low maintenance are common to all

our door solutions. That is probably why we have so many satisfied customers in many different industries. Our door solutions are at work in all corners of the industry, from the off-shore and ship industry to retailers. Among the companies that have benefited from our products are slaughterhouses, pharmaceutical companies, dairies and supermarket chains.

DOORSYSTEM

SOLUTIONS FOR THE

PHARMACEUTICAL  
INDUSTRY

WE DELIVER **DURABLE DOOR SOLUTIONS** THAT LIVE UP TO THE **STRICT REQUIREMENTS TO MATERIALS, HYGIENE AND RELIABILITY** IN THE **PHARMACEUTICAL INDUSTRY**

CLEANABILITY

**100%**

Door System has developed a 100 % cleanable line of products specifically for the pharmaceutical industry. Doors without hidden cavities or edges that can gather dust. Constructed so that the water runs off. Everything that needs to be cleaned can be cleaned. The rest is encapsulated and has no contact with the surroundings.

PRESSURE DIFFERENCE

**45 Pa**

We are aware that pharmaceutical companies for clinical reasons create overpressure in production areas. This means a pressure difference in the doorway between two rooms. We have therefore designed the doors to function in surroundings with a pressure difference of up to 45 pascal.

### Solutions adapted to pharmaceutical companies

Door System doors are developed specifically for maximum reliability, which is paramount in pharmaceutical companies, and for a top clinical production environment. Easy access to 100 % cleaning. Automatic controls encapsulated in stainless and waterproof boxes. No visible screws or fitting plugs. Interlock system between doors. Safety sensors on all automatic doors. These are just some of the details that make our doors the right choice for pharmaceutical companies.

## SAVE TIME AND MONEY

# EASY CLEAN

The pharmaceutical industry often has very high hygienic requirements. Production facilities are cleaned with potent cleaning agents, and this places high demands on the machinery that operates in such areas. Door System has therefore developed its own line of products specifically for the pharmaceutical industry.

High Speed Door DS320P is easy and fast to clean inside the casing and on both sides of the curtain. Simply remove the guide with a normal screw driver. On hinged doors, the automatic parts are encapsulated in a waterproof, stainless box that withstands cleaning with high water pressure. If service is required, loosening four screws gives access to the automatic parts. You save both time and money.

All fittings and screws in our door solutions are manufactured and tested to withstand even the most potent cleaning agents.

## ARE YOU WILLING TO GAMBLE WITH SAFETY?

# BUILT-IN SAFETY

Product reliability is paramount in the pharmaceutical industry. The price of a screw or plug suddenly gone missing may be incalculable. The screw **MUST** be found before production can resume, and it can cost millions. It simply must not happen.

At Door System we have eliminated visible screws and fitting plugs on our door and gate solutions. We have thus

also eliminated the risk that loose fittings end up in the bottle with the pain killers.

Personal safety is another important element and focus in our design. All automatic doors are equipped with safety sensors to eliminate the risk of being hit by a door that is about to close.

## STANDARD AT DOOR SYSTEM

# INTERLOCK

Hygiene production often requires that doors are locked in relation to each other. In Door Systems control panel, an Interlock solution (barrier between 2 gates) is built-in as a standard. You do not have to pay extra.

Our control has many other standard built-in functions. It may, for example, function with PLC systems and has built-in time control, which allows you to, among other things, establish access control on the door after hours.

WE BUILT ALL OUR  
PRODUCTS AT **OUR OWN**  
**FACTORY** IN EASTERN  
JUTLAND. THIS ENSURES  
BOTH QUALITY  
AND **FLEXIBILITY**.

## WE CUSTOM DESIGN YOUR DOOR

# 25 YEARS' EXPERIENCE

Door System has more than 25 years' experience in production of steel doors as well as a natural interest in making things easier and more intelligent. That is your guarantee that we have the right background for solving your challenge.

Standard solutions often are not an option. Either due to space limitations or because the customer has specific demands to the door solution. Our technicians have the competences to solve even the most inconceivable assignments. In fact, Door System has turned down very few assignments in its history.

We put great emphasis on developing our products in partnership with the customers. After all, they will be using our solution. Ultimately, solving the customer's problem is what creates value for our business.

In our experience, different customers often struggle with identical problems and Door System's motto "making the special into standard" shows that the extra value we create benefits other customers – the positive circle!

## PROVEN QUALITY

# 100%

Being a supplier to Door System can be quite a challenge. We only select components that we assess to be the very best for our products. We know that the pace is high in the pharmaceutical industry. Therefore things have to work. We have to focus on the overall lifetime costs – quality pays off in the long run. Nothing is saved by using cheaper components if the result is constant service on a door. Every detail is important to us and nothing leaves our factory until we are sure that it is 100 % ready.

## CUSTOMER SERVICE

# 24/7

Door System has service fitters throughout the country, which allows us to react quickly to emergencies. We will not leave until our product is correctly installed and runs as intended.

Door System offers full scale service agreements that include all doors, sectional doors and loading ramps in your company. We carry out service and repairs according to current rules. This naturally includes products from other door manufacturers.
