

WE SUPPLY **RELIABLE, HARD-WEARING DOOR SOLUTIONS**, DESIGNED TO MATCH OUR CUSTOMERS' **INDIVIDUAL REQUIREMENTS**. FOR WHEN YOU ARE BUSY RUNNING YOUR COMPANY, BUSINESS SHOULD NOT BE HALTED BY POOR QUALITY DOORS.

DOCUMENTED QUALITY

100%

At Door System we believe that quality pays in the end. Our primary focus is on our customers' total cost of ownership. That is why we choose only the very best components for our door solutions. We are particular about every single detail, and nothing leaves our factory until we are certain that it is 100% in order. This philosophy gives our products an extend life cycle

CUSTOMER SERVICE

24/7

Door System has a field force of skilled service fitters available throughout the country, so we can respond quickly to urgent needs. Our service helpline is open 24/7. We offer full-scale service agreements covering all doors, and loading bays in your company. All service and repair work is made in accordance with all applicable rules and regulations.

Quality components ensure **high reliability**, which again translates into **low operating costs**.

DRIVEN BY OUR PASSION FOR QUALITY AND INNOVATION

Since 1998, Door System has designed, manufactured and installed doors for industrial companies throughout Europe and the rest of the world. From the very beginning, we have adhered to our basic philosophy of always making door solutions of the very highest quality.

As a result, our solutions may not always be the lowest price. However, the high reliability and significant savings on energy

and maintenance costs offered by our products make them a very profitable investment over the length of their life cycle.

We develop and manufacture all our doors at our own factory in Denmark. Our skilled employees, with years of know-how and technical insight, are one of the main reasons for the high quality and the many innovative solutions supplied by Door System.

WE BUILD ALL OUR PRODUCTS
AT OUR **OWN FACTORY** IN
EASTERN JUTLAND, WHICH
GUARANTEES BOTH QUALITY
AND **FLEXIBILITY**

QUALITY THAT PAYS

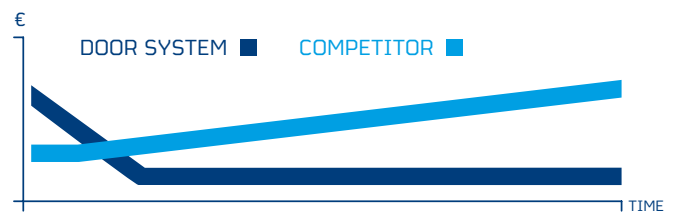

OUR PHILOSOPHY

At Door System, we develop all our door solutions on the basis of the same basic philosophy: In the long run, a quality product will pay itself off – to the benefit of both our customers and ourselves. Our livelihood should come from our door solutions – not from our spare parts.

OWN FACTORY

In order to realise our philosophy, we have decided to gather our production and development activities under one roof in Denmark, working with a staff of hand-picked, innovative and experienced people who keep a constant focus on development improvement and reducing maintenance costs.

An investment in a high-quality door solution will soon pay itself off, thanks to the low energy consumption, low maintenance costs and long service life.

ROLLER DOORS

Our high-speed, low-noise roller doors are specially designed for supermarkets and warehouses, processing rooms and freezer rooms, and are tailor-made to meet the customers' particular needs and requirements on speed, hygiene, wind stability, cold impact, insulation, etc. The doors come with our unique collision protection which makes it a quick and easy job to get a door back in operation after a collision.

STEEL DOORS

Designed for heavy use and for keeping out uninvited guests. The materials we use are among the strongest in the business. Up to 2 mm stainless steel frames, door leaves with steel plate thicknesses up to 1.5 mm and sturdy stainless steel hinges allowing the door to open to a full 180 degrees. The doors may be equipped with magnetic switches, electric strikes, peepholes offering a 360-degree view, night locks, emergency exit door fittings and much more.

COLD STORE AND FREEZER ROOM DOORS

Hinged cold store and freezer room doors from Door System are made in a simple, functional and wear-resistant design, optimised for cleaning and hygiene requirements. We use materials with high insulating capacity and they come with thick gaskets which help ensure a tight close. We also offer a certified EI₂60-C fire door for cold stores.

SLIDING DOORS

Our sliding doors are the fastest and the most efficient, unobtrusive and reliable units available on the market. The weight distribution is optimised to minimise the wear on wheels and fittings. Door cases and door frames are developed with a 78 degree inclination, and bottom seals and mouldings are installed flush with the door leaf. This ensures optimum hygiene and ease of cleaning.

EI₂60-C FIRE DOORS / FIRE SLIDING DOORS

Door System supplies EI₂60-C fire doors, EI₂60-C fire sliding doors and emergency exit doors. We keep up to date with all regulations and requirements and often supply solutions which combine fire doors with other types of doors, including revolving doors, high-speed doors and cold store and freezer room doors. We can supply our doors complete with fire door closure control system or prepared for integration with a central fire alarm system.

EI₂60 FIRE WINDOWS

Door System offers EI₂60 fire windows with tempered and laminated fire glass and with an acid-resistant stainless-steel frame, AISI 316. The fire windows meet the food and pharmaceutical industries' stringent demands for hygiene.

EI₂60-C FIRE AND SMOKE CURTAINS

We can also offer Fibershield®-I EI₂60-C fire curtains. They do not take up much space above the opening and at the sides relative to fire sliding doors.

In addition to fire curtains, we also offer smoke curtains.

POLYCARBONATE SWING DOORS

Our specially developed polycarbonate swing doors are cost-efficient, extremely strong and optimised for areas with heavy traffic. With specially designed hinges integrated in the aluminium profile and with a spring built into the rear profile to ensure simplicity of installation. Door leaf in 5 mm transparent polycarbonate offering a full view. Non-pinch rear edge in black rubber to prevent finger trapping injuries.

PVC STRIP CURTAINS

Strip curtains from Door System are a simple, cost-effective way to divide rooms and protect against draught, dust, heat, cold and noise, while ensuring unhindered passage. We have developed a unique suspension system in galvanised, or optional stainless steel which makes it easy to install and replace individual strips. Strips are supplied as individual components. We supply our strip curtains made to measure.

SPECIALISED SOLUTIONS FOR SPECIFIC INDUSTRIES, INDUSTRIES, DEVELOPED IN CO-OPERATION WITH OUR CUSTOMERS

CUSTOM-MADE SOLUTIONS

Door System has more than 20 years of experience with the production of steel doors and a mutual interest in doing things more efficiently and intelligently. This is your guarantee that we are in just the right position to take up your challenge.

Quite often, a standard solution is simply not up to the task. Either because there is not room enough for it, or because the customer has a number of specific requirements regarding the door solution's properties. We have technicians with the skills to handle even the most unthinkable jobs. With very few exceptions.

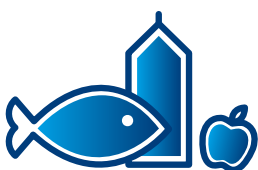

It is important to us that the development process takes place in close co-operation with our end customers. After all, they are the ones who will be using our solution. Solving the customer's problem is what ultimately creates value for the company.

Quite often, the problems faced by one customer are likely to give other customers trouble as well. Consequently, Door System always makes a point of refining our customised solutions to create added value and ultimately benefit of all our customers.

FOOD INDUSTRY

- **INSULATION** SAVING LOTS OF ENERGY
- **COLLISION PROTECTION** ENSURING **LOW MAINTENANCE COSTS**
- **FAST OPENING SPEED** FOR **INCREASED EFFICIENCY**
- **HYGIENE** - DESIGNED FOR THOROUGH CLEANING

Doors for the food industry. This was where it all began. For more than 20 years we have designed and delivered extremely strong, highly insulated door solutions to keep the food industry's costs of energy, operations and maintenance to a minimum.

Door System's new EI₂60-C fire sliding door is shown mounted and in operation at a Danish cattle abattoir.

PHARMACEUTICAL INDUSTRY

- **100% CLEANING-FRIENDLY**
- **WITHSTANDS PRESSURE DIFFERENCES UP TO 15 PASCAL**
- **INTERLOCK SOLUTION INTEGRATED BY DEFAULT**
- **NO VISIBLE SCREWS OR FITTING PLUGS**

Optimised to withstand pressure differences of up to 15 Pa. Easy access to 100% cleaning. Automatic components encapsulated in stainless steel, water-tight boxes. No visible screws or fitting plugs. Interlock system integrated between doors. These are just a few of the details which make our solutions the obvious choice for the pharmaceutical industry.

Door System's sliding door with hands-free operation for clean room class C, with green, yellow and red LED lights (hidden in the casing), which increases safety.

RETAIL BUSINESS

- **HIGH SECURITY STEEL DOORS, AND THE STRONGEST FRAMES ON THE MARKET**
- **SUPER VISION PANEL OFFERING FULL 180-DEGREE VIEW FROM THE INSIDE**
- **STATE OF THE ART FIRE DOORS AND EMERGENCY EXIT DOORS**
- **DESIGNED FOR HEAVY USE - THE STURDIEST DOORS ON THE MARKET**

In co-operation with a number of the country's largest retailers, such as Netto, Rema1000, Lidl, MENY, SPAR and Kvickly we have developed modern functional and hard-wearing door solutions to keep uninvited guests out while meeting retailers' need for speed, security and advanced control units.

Solid and durable steel doors.

HIGH QUALITY AND SERVICE DELIVER BENEFITS THAT MAKE A DIFFERENCE, RESULTING IN HAPPY CUSTOMERS

QUALITY

78%

An internal survey shows that no less than 78% of our customers consider the quality of our products to be higher or much higher than that of competing products. 17% find that our quality is at least as high as that of the competitors, while a mere 5% consider our quality to be slightly lower – and we are working hard to bring that last figure down to 0%!

SERVICE AND INSTALLATION

82%

We are proud to have the most skilled fitters and employees in the business, which clearly benefits our customers. For as many as 82% of our customers feel that we deliver better or much better service and installation than our competitors.

CUSTOMER TESTIMONIALS

"The collision protection on the high-speed doors from Door System is simple but brilliant – just the sort of thing we want!"

Arla Food, Bov Dairy

"The energy calculations for the insulated high-speed door convinced us that we simply had to try it!"

Tulip, Svenstrup

"We have purchased a large number of doors and gates from Door System – they respond really quickly whenever there is something we need!"

Danish Crown Amba, Ringsted

"We could save money on the electricity bill – so we chose 11 insulated high-speed doors. Some of them operate up to 50,000 times a month – and we never encounter any problems which cannot be handled by our own people!"

INCO, Denmark

"These doors work incredibly well – and any problem that we might occasionally run into is quickly addressed by giving Door System a call!"

Fan Milk Ltd.

"When we load our products for shipment, our forklifts go straight through the locks and onto the lorries. The doors from Door System respond so fast and accurately that the operator does not have to stop the forklift. And the short opening and closing time ensures a minimum of cold loss from the cold store, thereby saving energy."

Bring Frigoscandia, Helsingborg

"The door has now been in operation for three years, and in connection with a new energy savings project the Danish Technological Institute inspected the company and made some calculations on a corresponding door. In fact, they concluded that our annual savings are close to 90,000 kWh!"

Claus Sørensen, Engesvang
