

Our high-speed, low-noise roller doors are specially designed for supermarkets, warehouses, processing rooms and freezer rooms and are custom-made to meet our customers' specific needs and requirements on speed, hygiene, wind stability, cold impact, insulation etc. The doors come with our unique collision protection, which makes it a quick and easy job to get a door back in operation after a collision. We have collected relevant data below on our roller doors.

Door types and selection of door

All doors are made according to the customer's request, however at max. size according to the following:

- DS260 – aluminum door for internal use (changes are limited), max. size 3000x3000 mm
- DS280 – door for smaller openings and for internal use
- DS291-DS301 – primarily for external use, max. size 4000x3400 mm, however max. 10 m²
- DS290-DS305 – primarily for internal use, max. size 4000x5000 mm, however max. 14 m²
- DS320P – for interior use, suitable for pharma / clean room, max. size 4000x4000 mm
- DS350-DS375 – for external use, robust door, max. size 5000x5000 mm, however max. 16 m²
- DS700 – for external use, high wind-load, max. size 7000x6000 mm, however max. 20 m²
- DS800+DS850 – can be used for cold store and freezer rooms on both warm and cold side, made in max. size 4000x5000 mm.

Fabric

2 mm reinforced fabric, available in the following colors:

- Grey (dark)
- Grey (light)
- Blue
- Orange
- Yellow
- Red

0.8 mm industrial fabric (can only be used in DS280-DS290), available in the following colors:

- Grey
- Blue

Both reinforced fabric and industrial fabric are available with print.

Vision window can be inserted vertically / horizontally in both armored fabric and industrial fabric.

At the DS800 and DS850, the fabrics are welded together so that cells with insulating material occur, the total thickness of the insulated fabric is 43 mm. Insulated fabric is standard available in blue. Insulated fabric is not made with windows.

In addition, special fabrics such as antistatic fabric.

U-values for the different fabric types are:

2 mm reinforced fabric: 70.6 W/m²K – 3 mm insulated fabric: 4.0 W/m²K – 43 mm thermo fabric: 0.54 W/m²K

Note! The U-value only applies to the fabric itself, not to the entire door.

Frames and coverings

DS260 is made with aluminum frames and white food-safe topcover.

The DS280-DS305 is manufactured as standard in galvanized steel. Available in stainless steel.

The DS320-DS850 is manufactured as a standard in stainless steel.

At full covering and high/wide gates, frames and covering are always in stainless steel.

The DS270-DS850 can be made with stainless steel (AISI 316).

3 mm insulated fabric, available in the following colors:

- White
- Grey (lys)
- Blue
- Green

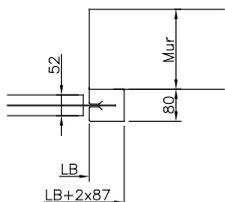

The fabric can be used at temperatures from -10°C to 70°C (not for freezer rooms).

Not available with vision window.

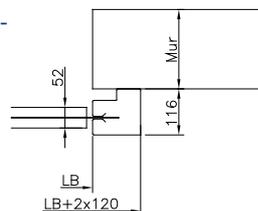

The fabric is available in a max width of 2.5-3.0 m (depending on the color).

Below the different frame types are shown:

DS300-DS305

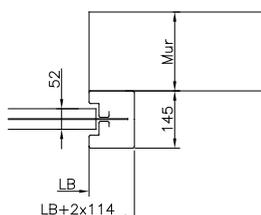

DS291-DS301

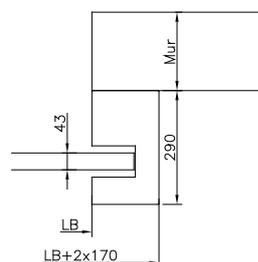

DS350-DS375

DS700

DS800-DS850

Bottom bar

Bottom bar at DS290-DS700 is always made in stainless steel.

Bottom bar at DS260 is always made in aluminum.

The DS280 comes with a sandbag instead of bottom bar.

Standard accessories

- 2 pcs. push buttons with emergency stop
- Photocells in the frame leg
- Photocells/DW switch in barrier

Electrical connection

230V, 16 Amp, HPFI relay 0,3 Amp

Accessories

- Pull switch
- Radar
- Radio control
- Photocell control
- Induction
- Window
