

Strip curtains from Door System are a simple and inexpensive room divider which requires very little maintenance. Strip curtains are used to prevent draught, dust, heat, cold and noise while ensuring unhindered transport passage. We supply strip curtains to industries of all kind, for instance, it is an obvious solution for livestock farming environments. We have collected relevant data below on our strip curtains.

#### Sizes and colors

Strip curtains are made of PVC material. The material is available in different widths and thicknesses. In addition, the material is available in 3 types, which are standard, Polar and Double ribbed. The type "Polar" is particularly suitable for freezer rooms. The type "double ribbed" is extra durable and, if installed in a humid environment, ensures that the strips do not stick together.

#### Suspension System

The suspension system is made according to the customer's wishes and can be supplied in the following types of steel:

- Galvanized
- Stainless steel

Aluminium rail.

Can be delivered where the curtain slides to one side.

Width [mm]	Thickness [mm]	Clear	Colour (standard type only)			Polar	Double ribbed (also available as polar)
			White	Red	Black		
100	1.2 and 2	X					
200	2	X	X	X	X	X	X
200	3	X				X	
300	3	X	X	X	X	X	X
400	4	X					
1000	2, 3, 5 and 7	X					
1200	3, 5 and 7	X					
1500	2 and 3	X					

PVC strip curtains are made according to the customer's wishes, but not on lengths above 5 m in height.
