

Polycarbonate swing doors are cost-efficient, extremely strong and optimised for areas with heavy traffic. Polycarbonate is a type of plastic which is rather light but nevertheless hard and resistant to collisions, heat and cold. We have developed our very own swing door. For instance the hinges are developed with the spring integrated in the alu-profile, so you will not need to drill a hole in the wall to accommodate it. We have collected relevant data below on our swing doors.

### Sheet material

5 mm transparent polycarbonate plate coated with 1.5 mm colored polycarbonate plate.

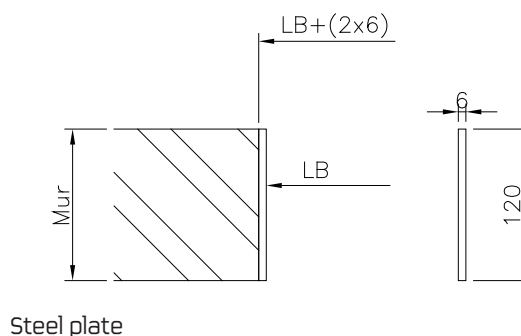

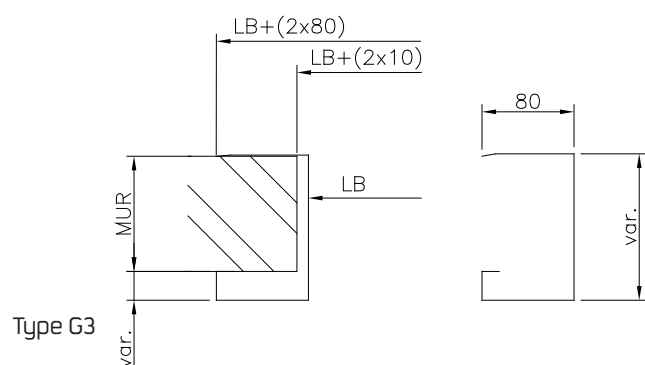

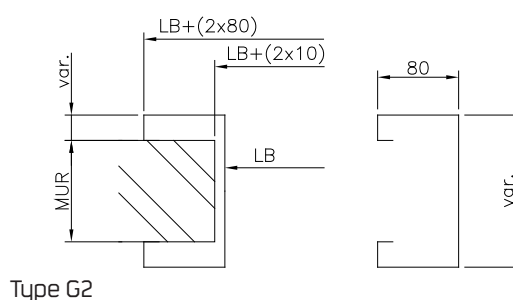

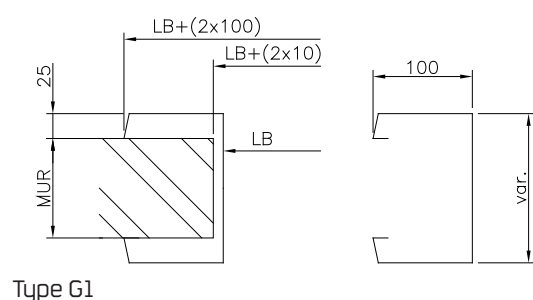

The plates are available in the following colors:

- Light gray
- dark grey
- Clear blue
- Dark blue
- Black
- White

The door leaves all have a rigid and strong aluminum rear edge.

### Frames

Made of 1 mm stainless steel. Depth and height of the frames can often be adjusted, but by default the following design:

### Accessories

Shock absorbant bumper (black)  
Automation
